OneMart – E-commerce Frontend Application

A Modern React-Based Online Shopping Platform (Frontend Only)

1. Project Overview

OneMart is a modern and responsive e-commerce web application built using React JS, designed to provide users with a seamless online shopping experience. This project focuses entirely on the frontend implementation, simulating real-world e-commerce functionality without backend integration.

The platform allows users to browse products, view product details, add items to the cart, and manage their shopping experience efficiently through an intuitive UI.

All data is handled using static JSON, local state, or localStorage.

2. Project Definition

OneMart is a frontend-only e-commerce platform that replicates core functionalities of an online shopping website without backend services or payment gateways. It uses client-side state management to simulate real-world behavior.

3. Key Functional Capabilities

- Product listing with categories
- Product detail view page
- Add to cart functionality
- Remove/update cart items
- Cart persistence using localStorage
- Product search and filtering
- Responsive design
- Navigation using React Router
- Clean UI/UX

4. Objectives

Core Objectives

- Build a modern frontend e-commerce UI using React JS
- Implement reusable components
- Simulate real-world shopping experience
- Ensure responsive design
- Demonstrate state management

Business Objectives

- Provide smooth user experience
- Improve product discoverability
- Enable quick cart operations
- Showcase frontend skills
- Build scalable UI foundation

5. Scope

- Product browsing and listing
- Category filtering
- Search functionality
- Product detail page
- Cart management
- LocalStorage persistence
- Responsive UI

6. Technology Stack

Frontend

- React JS
- JavaScript (ES6+)
- React Router DOM
- Redux / Context API
- Material UI / Bootstrap / CSS

Data Handling

- LocalStorage
- Api integation

7. Features (UI Pages)

- Home Page
- Product Listing Page
- Product Detail Page
- Cart Page
- Search & Filter UI
- Responsive Navbar & Footer
